The ADM yield factor is calculated by dividing the district's FY 2016 100-day ADM by the number of existing housing units in that district as of the middle of the fiscal year (December 31, 2015). The ADM of district sponsored charter schools is included in the calculation due to the fact that all district sponsored charter schools have reverted to district schools by FY 2017. For Florence Unified District, the ADM and the number of existing housing units include those from the consolidated area. For Coolidge Unified District, the ADM and the number of existing housing units exclude those from the consolidated area.

Data sources: ADM from Arizona Department of Education; housing units from combining the baseline housing information from U.S. Census 2010 and subsequent residential completion data from Central Arizona Governments. Neither the SFB nor the source agencies can guarantee the accuracy of the information presented in the table.
